- Welding Helmets, Gloves, Filler Metals

Manual and Automated Welding Equipment Solutions

Are you in the market for new welding equipment for your school or business? PIT serves industry and education in the region as a distributor for Fronius USA's manual and automated welding systems and APT Manufacturing's modular welding solutions, using Fronius power sources and FANUC robots and cobots. Through our after sale service and support team, we can ensure you make the most of your investment.

Welding Workshops

New to welding and want to learn more before committing to the trade? Are you a hobbyist with home projects? Pit Weld U's welding workshops are a great place to start and are designed for the beginner with zero experience. Half-day artistic weld art events, 2-day theory based weekend workshops, and 5-day youth summer camps are available to help you learn to weld!

Pit Weld U Classes

Licensed through the North Carolina State Board of Community Colleges, Pit Weld U offers a diverse selection of courses for those who wish to have a career in the trades. Students can choose the classes that fit their needs by selecting a pathway focusing on manufacturing, construction, and automotive industries. Classes start at an introductory level and build towards advanced applications including Arc Tool Robotics, pipe welding, Industrial GMAW processes and more.

Welder Qualification Testing

An American Welding Society (AWS) Accredited Testing Facility, PIT can assist with your welder qualification testing and certification needs. Testing can be scheduled at our welding lab in Mooresville, N.C. or on-site at the location of your choice. Serving individuals, small businesses and large employers alike, we can assist with your AWS, ASME and in-house qualification requirements.

Welding Procedure Development

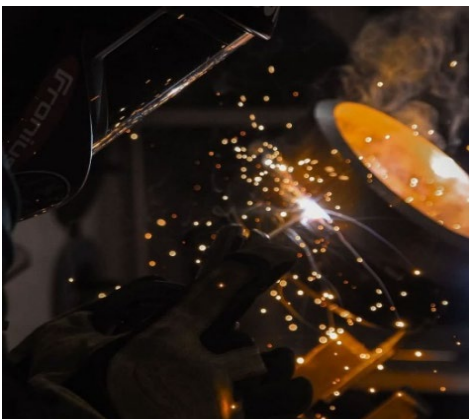

Need assistance with code interpretation and welding procedure development? We can help! Our expert staff includes experienced CWIs who have key AWS endorsements to support your needs.

CWI Services

Our CWIs are available for on-site inspections, welder assessments and other general needs if you're looking for a skilled team with whom to consult.

Customized Welding Training

If you have a unique project with a welding process or application that you're unfamiliar with, contact PIT! We can assist in building a focused training program to fit your timeline and budget for your organization. Training can be conducted on-site or at our welding lab.
